

Purpose of *Speak Freely*

Speak Freely: Essential Speech Skills for School-Age Children Who Stutter will help speech-language pathologists develop practical and effective clinical tools for working with school-age stutterers. Its materials are appropriate for students ranging in age from 7 to 18.

Speak Freely offers clinicians a user-friendly, explicit, and well-integrated progression of therapeutic procedures that will help students manage their stuttering and increase their speech fluency. It provides detailed instruction and materials that facilitate the development of specific stuttering modification and fluency-enhancing strategies.
