Anna Little Anna of Canada

Chapter one --Anna is almost punished.

It was early on a frosty morning, when the bells of the churches began ringing. Anna sat in bed and rubbed her eyes. Anna was seven years old and had black bobbing curls. She lived in a city of Quebec in Canada.

"Tant, Tant", called the little girl.

She was not yet fully awake. But that did not matter. Anna talked from the moment she opened her big brown eyes till the sleepy night came to close them.

"Tant it it is morning", she called.

She sprang out of bed, and now she was really awake.

Her aunts cross voice came to her from the next room.

"Hush, child. It is too early to be stirring," scolded the voice. "Go right back to bed quickly--But anne did not go right back to bed. First she went to her tiny bureau in her tiny room and took from a tiny drawer a very big letter.

Then she hopped into bed and drew the covers up high and opened the letter. She wrinkled her little white brow and stuck out her little pink tongue.

She was make believing that she could read the

Case 10

May 30

letter, But she could not read this letter at all because it was written in English.

Anna understood and spoke only French, That is why she called tante which means aunt in French.

It seems strange that a little girl living in North America should understand only French. But in Quebec Canada, Canada there are people who know no English at all,

This is because long ago the French settlers settled in Canada.

There were many wars between the French and the English, for both wanted to own Canada. Finally England won and now Canada belongs to England.

But the great, great, great grandchildren of those French people who settled so long ago are still living here.

In certain part of the city of Quebec one hears only French spoken. Yet some of the words could not be understood by a real Frenchman. The reason is they are not real French words. They are words that have been made up in Canada.

This same thing has happened in other countries. In Switzerland where they speak German, French and Italian some of the words are quite different from those in Germany.

Case 10

First they kick the ball off to the other team an they get it an go for a touchdown. Most the time they don't make ti but they try for a first down.

Sometimes they don't make it sometimes they do.

When they don't make it they try for a second down an if they don't make ti then they try to a third down an if they make it then they try for a fourth down. If they don't make it then the other team takes the ball. That's the way you play football.
